Betreff: All the Art Bellwald members Thank you!

During the three months I spent here, I felt the friendliness of the people of Vale. Cultural traditions, history, and lifestyle related to regional specialties and food culture. What I learned is a small part of Swiss food culture. But with these photographs, Vala's experience of successfully implementing tradition and innovation in a rapidly changing day-by-day situation seemed to me to be enough. It was nice to bake bread with the school children and it was nice to take the opportunity to make bread, although it is difficult to grow rye among these high mountains.

I don't know, but I could always listen to music while taking pictures, so I enjoyed the whole cooking process.

I am sure that these pictures will immortalize the history behind them and tell Mongolians a really interesting story of the mountain. We would like to express our gratitude to Switzerland for establishing friendly relations with Mongolia and for the great support of many Swiss people in the past. The Swiss treat us like brothers and sisters. This country implemented a comprehensive project in Mongolia. Soon the situation in Mongolia will improve and it will become a place where we can work together as much as possible. I'm glad to know that everyone here wants to live the same beautiful and simple life and experience European culture. We hope you enjoy this exhibition. People live smart in Valais. I love that the residents of Bellwald spend more time with their families and that everyone has a role to play in the village. I am very inspired by the current lifestyle in your country. I am excited to share this food story with you! Thank you for giving me this opportunity, it's been an unforgettable year!

29-30 December 2023

Sunderiya Erdenesaikhan

Mongolian photographer in Switzerland.
